➤ Part-Time Engineer | CIHEAM Bari, Tunisia June 2024 – Present

1) Project Name: Agri-Tech Nexus: Italo-Tunisian Integrated Innovation Center

Funded By: Italian Ministry of Foreign Affairs through the Italian Climate Fund

Year: 2024 - Ongoing (Progress Rate: 15%)

Project Cost: \$30M

Location: Zaghouan, Tunisia

Position Held: Deputy Project Manager

✓ Mission:

Lead the establishment of a cutting-edge Integrated Multifunctional Technological Center as part of the Italo-Tunisian TAN-dem Project. The center is designed to enhance food security through innovation and foster cross-border collaboration between Italy and Tunisia.

✓ Key Responsibilities:

- Spearhead the overall project execution, ensuring alignment with the project's strategic objectives and adherence to the terms of reference.
- Manage the planning, design, and construction phases of critical infrastructure, including research laboratories, biofactories, and precision agriculture demonstration fields.
- Facilitate the transfer of advanced technologies between Italy and Tunisia, ensuring seamless integration and adoption.
- Collaborate with international stakeholders, including government officials, to secure project approvals, manage expectations, and address potential challenges.
- Oversee the project budget, manage payment processes, and ensure cost-effective allocation of resources.
- Prepare comprehensive technical reports, ensure compliance with international codes (ACA, ADA), and maintain confidentiality of all project-related information.

✓ Objectives:

- Design and construct infrastructure to accommodate 500 students, with expansion potential.
- Establish state-of-the-art research laboratories and biofactories focused on agricultural innovation.
- Develop precision agriculture demonstration fields and pilot units for post-harvest processing.
- Facilitate the exchange of knowledge and technology between Italian and Tunisian partners, promoting sustainable agricultural practices.

➤ Project Manager - Ministry of Justice, Tunis (Full-Time) 2021 – 2024

1) Project Name: Construction of a New Prison in Beja with a Capacity of 1,000 Beds (21,000 Square Meters)

Funded By: Tunisian Government

Year: 2022 – 2024 (100 % Completed)

Project Cost: \$16.2M

Location: Beja, Tunisia

Position Held: Project Manager

✓ **Key Project Features: The project comprises a state-of-the-art correctional facility including**

- A men's detention block with a capacity of 450 beds.
- A men's prevention block with a capacity of 450 beds.
- A women's block with a capacity of 100 beds.
- Essential infrastructure such as a main entrance porch, kitchen, admission administration, administrative block, infirmary, security and disciplinary isolation block, and a rehabilitation block.

✓ **Key Responsibilities:**

- Directed the entire project lifecycle, from concept development through to execution, ensuring alignment with international standards and project objectives.
- Spearheaded the development of the facility's functional program, ensuring that all aspects of the design meet the operational needs and security requirements of a modern correctional facility.
- Played a critical role in the development of preliminary designs, detailed designs, and tender documents, ensuring compliance with relevant regulations and standards.
- Oversaw the monitoring, control, and coordination of construction activities, ensuring adherence to strict safety protocols and timelines.
- Engaged with local authorities, contractors, and other stakeholders to facilitate smooth project execution, address challenges, and ensure project milestones are met.
- Ensured that all construction activities met the required safety standards and that the project adhered to international correctional facility standards.

2) Project Name: Construction of a New Detention Prison in Borj Erroumi2 According to International Standards (17,783 Square Meters)

Funded By: Tunisian Government

Year: 2021 – 2023 (100 % Completed)

Project Cost: \$10.4M

Location: Borj Erroumi 2, Bizerte, Tunisia

Position Held: Security and Safety Manager

✓ **Key Project Features: This state-of-the-art facility includes**

- Two detention blocks, each with a capacity of 300 beds.
- A fully equipped infirmary and a central administration building.
- A kitchen and production workshops covering 5,000 square meters.
- A security and disciplinary isolation block.
- Sports and relaxation areas for both executives and staff.
- Installation of an advanced automatic extinguishing system (Water-Mist technology).
- Comprehensive external landscaping over 17,783 square meters.

✓ **Key Responsibilities:**

- Developed and implemented a robust security plan that ensured the safety and protection of the entire construction site, aligning with both international standards and local regulations.

ZAHOU ADNENE - Portfolio

- Worked closely with security authorities to guarantee compliance with all safety and security standards throughout the project's duration.
- Partnered with architects and planners to design and execute the second phase of the detention prison, ensuring all security measures were integrated into the design.
- Led the design and construction of the security and disciplinary isolation block, ensuring it met all safety and operational requirements.
- Oversaw the construction of sports areas and relaxation spaces for staff and executives, ensuring these facilities met both the functional and safety standards required.
- Ensured that the project adhered to international standards and local regulations from inception to completion, delivering a facility that meets the highest standards of security and safety.

3) Project Name: Construction of the Headquarters of the CGPR (General Committee of Prisons and Rehabilitation) Located at 9-April

Funded By: Tunisian Government

Year: 2023 – Technical Study 100% Complete; Execution Interrupted (Currently on Hold Due to Budget Constraints)

Project Cost: \$14.5M

Location: Tunis, Governorate of Tunis, Tunisia

Position Held: Project Manager

- ✓ **Key Project Features:** This project encompasses the construction of the General Directorate headquarters, featuring
 - Two basements, a ground floor, and eight upper floors.
 - A comprehensive facility designed to meet the operational needs of the CGPR.

- ✓ **Key Responsibilities:**
 - Directed the development of a detailed feasibility study, assessing the project's viability, financial implications, and alignment with organizational goals.
 - Crafted and refined the functional program, ensuring that the design met the operational and strategic needs of the CGPR while adhering to industry standards.
 - Coordinated and managed consultations for topographical and geotechnical surveys, ensuring accurate data collection and analysis to support project planning and design.
 - Oversaw the validation and approval process for architectural and technical studies, ensuring all design elements were compliant with regulatory requirements and project specifications.
 - Monitored budget constraints and resource allocation, managing project delays and ensuring that financial considerations were addressed in planning and execution phases.
 - Facilitated communication between stakeholders and project teams, maintaining transparency and addressing concerns related to project status and budget constraints.
 - Ensured that all project documentation, including studies and approvals, was comprehensive and accurately reflected the project's scope and objectives.

4) Project Name: Construction of the Continuing Education Center for Penitentiary Staff, Borj Touil

Funded By: Tunisian Government

Year: 2021 – 2023 (100% Complete)

Project Cost: \$12M

Location: Borj Touil, Governorate of Ariana, Tunisia

Position Held: Project Manager

- ✓ **Key Project Features:** This project involves developing a state-of-the-art training center for the continuous education of Ministry of Justice personnel. Key features include
 - A total area of 25,000 m².
 - Capacity to accommodate 750 beds.
 - Facilities include a simulation center for practical exercises, an administrative building, an infirmary, five accommodation blocks, a kitchen and dining hall, and an amphitheater with 800 seats.

ZAHOU ADNENE - Portfolio

✓ **Key Responsibilities:**

- Led the development of a comprehensive feasibility study, evaluating the project's scope, budget, and potential impact, ensuring alignment with organizational and educational goals.
- Developed and refined the functional program to align with the training needs of penitentiary staff, ensuring that all facilities met operational requirements and standards.
- Managed the coordination and execution of topographical and geotechnical surveys, ensuring accurate data collection and integration into the project planning.
- Coordinated and supervised technical studies, including architectural and engineering analyses, to ensure that all designs were feasible, compliant with regulations, and met project specifications.
- Monitored project progress and budget adherence, implementing strategies to address delays and cost overruns, and ensuring timely delivery of project milestones.
- Engaged with stakeholders, including Ministry of Justice officials and construction teams, to ensure effective communication and address any concerns or adjustments needed throughout the project.
- Oversaw quality control measures to ensure that all construction work met required standards and specifications, focusing on maintaining high standards of safety and functionality.

5) Project Name: Construction of Special Units (Canine, Equestrian, and Intervention) and Access Gates (including supply and installation of equipment such as retractable bollards and barriers)

Funded By: Tunisian Government

Year: 2022 – 2023 (100 % Completed)

Project Cost: \$2.5M

Location: 12 Prisons across Tunisia

Position Held: Project Coordinator in Security

✓ **Project Main Features:** These projects were designed to bolster the external security of penitentiary institutions and improve dynamic security measures across multiple sites. The main features include

- Establishment of specialized security units (Canine, Equestrian, and Intervention).
- Installation of advanced access control systems including retractable bollards and barriers.

✓ **Key Responsibilities:**

- **Security Equipment Management:** Directed the installation and integration of advanced security equipment, including retractable bollards and barriers, ensuring they met operational and security specifications.
- **Stakeholder Collaboration:** Coordinated with various stakeholders, including security experts, prison administrators, and equipment suppliers, to align project objectives with international security standards and regulatory requirements.
- **Project Monitoring and Reporting:** Oversaw the project's progress through regular monitoring and reporting, identifying potential issues and implementing corrective measures to keep the project on track.
- **Security Measures Implementation:** Implemented comprehensive security measures and protocols, including the design and deployment of specialized units, to enhance the overall security infrastructure of the penitentiary institutions.
- **System Evaluation and Validation:** Conducted thorough evaluations and validations of installed security systems to ensure their effectiveness, reliability, and compliance with established security standards.
- **Personnel Training and Briefing:** Provided training and briefings to security personnel on new systems and protocols, ensuring they were equipped to operate and maintain the new security features effectively.

➤ Civil Engineer - United Nations, BANGUI, CAR (Full-Time) 2020 – 2021

- ✓ **Position Held:** Judicial Infrastructure Development Specialist under UN Mission
- ✓ **Organization:** MINUSCA - United Nations Mission in the Central African Republic
- ✓ **Mission:**
- Judicial Infrastructure Development under the UN Mission, focusing on the rehabilitation and modernization of judicial facilities and detention centers in CAR.
- ✓ **Responsibilities:**
- Directed Rehabilitation and Modernization: Oversaw the comprehensive rehabilitation and modernization of judicial facilities, including courts and detention centers, to improve functionality and safety.
- Coordinated Facility Reopenings: Managed the reopening of courts and detention centers, ensuring that they met all operational and safety standards.
- Managed Detention Center Rehabilitation: Led the rehabilitation efforts for detention centers in Bangui, focusing on enhancing security, living conditions, and overall facility standards.
- ✓ **Achievements:**
- Successfully improved living conditions and security for over 300 inmates across multiple detention facilities through effective management of construction and renovation projects.
- Contributed to the development of judicial infrastructure that extended state authority, benefiting over 200,000 residents through the establishment of new regional offices.
- Strengthened prison management practices, resulting in a 25% reduction in incidents and improved alignment with international standards, enhancing overall facility operation and safety.

➤ Head of Construction Department - Ministry of Justice, Tunis (Full-Time) 2012 – 2020

1. Projects funded by the European Union

- ✓ **Position Held:** Civil engineer “Key project leader”– Justice Reform Program
- ✓ **Organization:** UNOPS – United Nations Office for Project Services
- ✓ **Mission:**
- Spearheaded the rehabilitation and modernization of judicial facilities and prisons under the Justice Reform Support Program (JRSP), funded by the European Union, across multiple sites in Tunisia.
- ✓ **Phase I:**
- Led the supervision of the rehabilitation of key judicial facilities, including prisons in Messadine and Gabes, and courts in Nabeul, Sfax 2, and Gabes, ensuring all upgrades met international standards.
- Spearheaded the modernization efforts, focusing on the enhancement of infrastructure and ensuring compliance with global best practices.
- Oversaw the provision and installation of state-of-the-art computer equipment across various Ministry of Justice structures, significantly improving operational efficiency and data management.
- ✓ **Phase II:**
- Contributed to the comprehensive rehabilitation of judicial infrastructures during the second phase of the program (JRSP II), which complemented and expanded the initial phase’s achievements.
- Supported the strategic provision of necessary equipment, further bolstering the capabilities of the justice system in alignment with the ongoing reforms.
- ✓ **Achievements:**
- Successfully rehabilitated 3 judicial and 2 penitentiary facilities, elevating them to international standards and significantly improving their functionality.

ZAHOU ADNENE - Portfolio

- Enabled the Tunisian Ministry of Justice to operate more effectively through the integration of advanced technology, directly impacting the efficiency of justice administration.
- Played an instrumental role in sustaining and expanding the justice reform initiatives, ensuring the long-term success and sustainability of the JRSP under EU guidance.

II. Projects funded by partners (INL, ICRC, UNODC, CIVIPOL, UNDP, IRZ, GIZ)

✓ **Position Held:** Civil engineer - Multilateral Programs

✓ **Mission:**

- Implementation of Multilateral Justice and Security Projects: Spearheaded projects funded by international partners (INL, ICRC, UNODC, CIVIPOL, UNDP, IRZ, GIZ) aimed at advancing justice reform and security initiatives.

✓ **Key Responsibilities:**

- Directed the activities of joint monitoring and control committees, ensuring project alignment with objectives and effective collaboration among stakeholders.
- Led and motivated the project management team, overseeing all phases of project implementation from initiation to closure.
- Established strong relationships with the steering committee and key stakeholders, ensuring their active involvement and support.
- Systematically documented project progress, produced mission and assurance reports, and prepared detailed minutes of meetings.

✓ **Key Achievements:**

- Ensured the successful closure of multiple projects funded by international partners, meeting all deliverables and objectives.
- Strengthened collaboration among stakeholders, leading to improved project outcomes and alignment with strategic goals.
- Delivered projects that contributed to the achievement of Millennium Development Goals (MDGs) by advancing justice reform and security initiatives.
- Maintained proactive communication, ensuring all stakeholders were well-informed about project activities, progress, and exceptional situations.

III. Projects funded by the Tunisian Government (2012-2020)

1) Project Name: Construction of a new prison located in BELLI with a capacity of 1080 beds according to international standards (22000 square meters).

Year: 2017-2020

Project Cost: \$18.4M

Location: Belli, Nabeul, Tunisia

Position Held: Project Manager

✓ **Key Project Features:** The project involved the construction of a modern correctional facility designed to meet international standards, including

- Three Men's Blocks: Each with a capacity of 300 beds.
- Highly Secure Block: Designed for high-risk inmates with a capacity of 80 beds.
- Women's Block: With a capacity of 100 beds.
- Supporting Infrastructure: A bakery, kitchen, administrative offices, infirmary, secure and disciplinary isolation block, visiting areas, rapid intervention brigade, and specialized units for canine and equestrian brigades.

✓ **Key Responsibilities:**

- Directed the entire project lifecycle, from feasibility study through to project completion, ensuring adherence to international standards and project goals.
- Participated in the development of preliminary designs, detailed designs, and tender documents, ensuring compliance with security requirements and operational needs.

ZAHOU ADNENE - Portfolio

- Served as a key member of the committee for opening technical and financial bids, ensuring transparent and efficient selection of contractors.
- Managed the monitoring, control, and coordination of construction activities, ensuring all work met the highest standards of safety, quality, and security.
- Collaborated with local authorities, contractors, and other stakeholders to address challenges, facilitate smooth project execution, and ensure timely completion.
- Validated payments and ensured that project costs were kept within budget, while maintaining quality standards and project timelines.

2) Project Name: Construction of the First Phase of a New Mixed Prison in Beja

Year: 2016-2018

Project Cost: \$2M

Location: Beja, Tunisia

Position Held: Coordination Engineer

- ✓ **Key Project Features:** The project entailed the development of critical infrastructure for a mixed-use prison facility, designed to meet international security standards, including
 - A 7-meter-high perimeter concrete fence ensuring maximum security.
 - Visiting block, rapid intervention brigade, canine brigade, and equestrian brigade, integrated into the overall facility design.
 - Construction of three housing units for essential personnel.
 - Development of external landscaping over an area of 50,000 square meters.

- ✓ **Key Responsibilities:**
 - Collaborated with stakeholders to plan and design a comprehensive security infrastructure, including the 7-meter reinforced concrete fence, ensuring compliance with security standards.
 - Coordinated the design and construction of specialized units, including the visiting block, rapid intervention brigade, and canine and equestrian brigades, ensuring seamless integration into the overall facility.
 - Oversaw the construction and completion of three staff housing units, ensuring they met the operational needs of the facility and provided suitable accommodation for essential personnel.
 - Strategically managed a \$2M budget to optimize resource utilization and ensure cost-effective project execution, while maintaining high-quality standards throughout all construction phases.
 - Enforced strict security protocols on-site to prevent unauthorized access, protect workers, and maintain a safe construction environment.

3) Project Name: Construction of the First Phase of a New Detention Prison in Borj Erroumi2

Year: 2017-2020

Project Cost: \$3.1M

Location: Nadhour, Bizerte, Tunisia

Position Held: Coordination Engineer

- ✓ **Key Project Features:** This project involved the construction of a detention facility, adhering to international standards, with the following key components
 - Detention Block: A 3,556-square-meter block with a capacity of 300 beds, designed to meet the highest standards of security and inmate management.
 - Installation of advanced technical infrastructure, including an automatic Water-Mist extinguishing system for enhanced fire safety.
 - Development of external landscaping covering 17,783 square meters to enhance the environmental and functional aspects of the facility.

- ✓ **Key Responsibilities:**
 - Led the planning, design, and supervision of external landscaping, ensuring it contributed to both the aesthetic and functional goals of the detention facility.
 - Planned and oversaw the installation of technical facilities, ensuring they met the operational demands of the detention block and adhered to international safety standards.

ZAHOU ADNENE - Portfolio

- Worked closely with architects and planners to design and implement the first phase of the detention block, ensuring it was built to accommodate 300 beds while maintaining strict compliance with international detention standards.
- Partnered with relevant authorities to develop and enforce a comprehensive security plan, safeguarding both the construction process and the future operational integrity of the facility.

4) Project Name: Extension of Sousse-Messadine Prison

Year: 2018-2020

Project Cost: \$2.08M

Location: Messadine, Sousse, Tunisia

Position Held: Deputy Project Manager

✓ **Key Project Features:** This project involved the extension of the Sousse-Messadine Prison to enhance its capacity and functionality, featuring

- Construction of three new detention blocks, each with a capacity of 150 beds, designed to meet international standards for safety and security.
- Development of a central administration building to streamline prison management and operations.
- Installation of a fully equipped control room to enhance surveillance and security.
- Renovation of the existing administration building to improve its functionality and integration with the new facilities.
- Upgrades to the prison's perimeter security to ensure comprehensive protection and compliance with international standards.

✓ **Key Responsibilities:**

- Led the development of the functional program, ensuring it met the operational needs and security requirements of the extended prison facility.
- Contributed to the creation of preliminary and detailed designs, as well as the preparation of tender documents, ensuring they met all regulatory and international standards.
- Oversaw the surveillance, control, and coordination of construction works, ensuring adherence to project specifications, safety standards, and timelines.

5) Project Name: Rehabilitation and Extension of Mornag Prison (Block "C")

Year: 2018-2020

Project Cost: \$2.28M

Location: Mornag, Ben arous, Tunisia

Position Held: Project Coordinator

✓ **Key Project Features:**

- This project aims to enhance the capacity of Block "C" of Mornag Prison, increasing its bed capacity to 750 in alignment with international standards. The development includes five pavilions (each housing 150 beds), an additional infirmary, a rehabilitation area, walking paths, a visiting area, and a new entrance porch.
The initiative is designed to create a specialized sector for active inmates, thereby boosting the production capacity of the prison's workshops and contributing to national economic efficiency through cost reduction.

✓ **Responsibilities:**

- Developed and implemented the project's security plan, coordinating with relevant authorities to ensure safety and compliance.
- Supervised the construction of five pavilions, each designed for 150 beds, adhering to international standards.
- Planned and executed the construction of additional facilities, including an infirmary, rehabilitation space, walking areas, visiting space, and a new entrance porch.
- Worked with healthcare professionals to ensure the functionality and safety of the medical and rehabilitation facilities.

ZAHOU ADNENE - Portfolio

- Coordinated with prison authorities to establish a sector for active inmates, aimed at enhancing the production capacity of the prison workshops.
- Developed and implemented security protocols for the newly constructed facilities.
- Collaborated with economic experts to identify and apply cost reduction strategies, optimizing project expenses.

6) Project Name: Construction of Psychiatric Hospital Unit in Rabta

Year: 2018-2020

Project Cost: \$2.58M

Location: Tunis, Tunisia

Position Held: Junior Project Manger

✓ Key Project Features:

- This project focuses on building a specialized hospitalization unit for inmates with psychiatric disorders, designed to meet their specific medical and therapeutic needs.

✓ Responsibilities:

- Contributed to the development and evaluation of the feasibility study for the psychiatric hospital unit.
- Managed consultations and coordination for topographic and geotechnical surveys, ensuring accurate and reliable data for project planning.
- Facilitated effective communication and collaboration among various stakeholders to ensure project alignment and progress.

7) Project Name: Construction of Juvenile Center with 140-Bed Capacity

Year: 2014-2015

Project Cost: \$5.14M

Location: Municipality of Gammarth, Tunis, Tunisia

Position Held: Member of the Technical Committee

✓ Key Project Features:

- This project entails the construction of a juvenile center designed to accommodate 140 beds, adhering to international standards. The facility includes detention blocks for three regimes (closed, semi-open, and open), an educational block, visiting area, kitchen and cafeteria, infirmary, admission administration, central administration, control room, workshops, sports area, technical rooms, and a control and assignment unit.

✓ Responsibilities:

- Reviewed and validated the feasibility study to ensure project viability and alignment with objectives.
- Developed the functional program detailing the requirements and specifications for the juvenile center.
- Initiated and managed consultations for geotechnical and topographical studies, and validated the results to inform project planning.
- Prepared comprehensive tender documentation to facilitate the procurement process.

8) Project Name: Construction of Clinic for Tunisian Ministry of Justice Personnel

Year: 2016-2017

Project Cost: \$3.06M

Location: Municipality of Tunis, Tunisia

Position Held: Project Coordinator

✓ Key Project Features:

- This project involved constructing a clinic—a small hospital with a capacity of 35 beds. The clinic offers a range of services including consultations, emergency interventions, medical monitoring for pregnant women and childbirth, and acts as a referral point for more serious cases to major

ZAHOU ADNENE - Portfolio

hospitals in Tunis. It also centralizes vaccination campaigns, monitors young children's nutrition, and conducts school medical inspections. The facility comprises a basement, ground floor, and upper floor, with a total covered area of 4,617 square meters.

✓ Responsibilities:

- Developed the functional program detailing the clinic's operational requirements and medical services.
- Contributed to the creation of Preliminary Designs, Detailed Designs, and Tender Documents to guide the construction process.
- Monitored, controlled, and coordinated the construction works to ensure compliance with design specifications and project objectives.

9) Project Name: Construction of Storage and Distribution Center

Year: 2015-2016

Project Cost: \$5.73M

Location: Municipality of El Mornaguia, Manouba, Tunisia

Position Held: Project Manager

✓ Key Project Features:

- This project involved constructing a metal-structured storage and distribution center designed for receiving, storing, inventory management, order preparation, and shipping operations. The facility adheres to quality procedures, hygiene and safety regulations, and time constraints. It includes a central administration building with a control room and four central warehouses, each spanning 320 square meters. The warehouses are equipped with facilities for receiving goods, compliance checking, and delivery.

✓ Responsibilities:

- Developed the functional program outlining the operational requirements for the storage and distribution center.
- Coordinated among various project components to ensure seamless integration and execution.
- Participated in the development of Preliminary Designs, Detailed Designs, and Tender Documents to guide the construction process.
- Monitored, controlled, and coordinated construction activities to ensure adherence to design specifications and project timelines.

10) Project Name: Construction of Production Workshops at Mornag Prison

Year: 2015-2016

Project Cost: \$1.9M

Location: Municipality of Mornag, Ben Arous, Tunisia

Position Held: Deputy Project Manager

✓ Key Project Features:

- This project involved establishing a production center for creating various wood items intended for both penal and civilian use. The center comprises five workshops (Metallurgy, Carpentry, Aluminum Carpentry, Sewing) designed to rehabilitate inmates and prepare them for societal reintegration. It also aims to contribute to the national economy by reducing project costs. The facility includes training and classroom spaces, an administrative office, and has a capacity for 500 working inmates, generating an estimated annual income of \$300,000 for the first three years.

✓ Responsibilities:

- Coordinated with relevant stakeholders, including prison authorities and vocational training experts, to align project objectives.
- Collaborated with instructors and experts to design effective training programs aimed at inmate rehabilitation.
- Oversaw security measures within the workshops to ensure the safety of inmates and staff.

ZAHOU ADNENE - Portfolio

- Coordinated with vocational training institutions to establish educational partnerships and enhance training effectiveness.
- Implemented programs to support inmate reintegration through skills enhancement and vocational training.
- Worked with economic experts to estimate and achieve cost reduction goals for the project.
- Managed the training and classroom facilities, ensuring they met educational and operational standards.
- Monitored and evaluated the center's capacity utilization and revenue generation to assess performance.

11) Project Name: Construction of Administrative Buildings, Recreation Spaces for Executives and Staff, Waiting Rooms, and Extension of Existing Facilities.

✓ Project Main Features:

- The idea behind the projects is to renovate old buildings or construct extensions to meet the needs of staff or functional requirements.

✓ Positions Held: Assistant Project Director / Project Director / Coordinator.

✓ Missions:

- Development of the functional program.
- Coordination among different designers (architecture and special lots).
- Participation in the development of technical files for Preliminary Studies, Detailed Project Studies, and Tender Documents.
- Monitoring, control, and coordination of works.

✓ Locations and Details:

- Saouef / 2014 / 0.2 M\$.
- Seliana / 2017 / 4.3 M\$.
- Sfax / 2017 / 0.3 M\$.
- Sers / 2017 / 0.15 M\$.
- Kasserine / 2017 / 0.43 M\$.
- Bazma / 2018 / 0.33 M\$.
- Gafsa / 2018 / 0.25 M\$.
- Messaadine / 2019 / 0.33 M\$.
- Dir / 2019 / 0.3 M\$.

➤ Civil engineer - Ministry of Justice, Tunis (Full-Time) 2011 – 2012

✓ Project Main Features:

- The project aims to renovate old facilities (prisons, juvenile delinquency centers, barracks, first-instance courts, cells, detention centers, basic and continuing training centers, shooting ranges) in accordance with international standards. This aims to strengthen their dynamic security systems and implement new technologies to enhance the overall security of these establishments.

✓ Missions:

- Development of the functional program.
- Preparation of Preliminary Design.
- Detailed Project Design - Involves detailed planning for all components across different lots (architecture, electrical and equipment, fluids, structure).
- Tender Documents - Preparation of tender documents for each lot following the Tunisian model of public procurement.
- Coordination, monitoring, and control of construction works.

✓ Position Held: Project Coordinator in charge of security compliance.

ZAHOU ADNENE - Portfolio

✓ **Location and Details:**

- Borj Elamri / 2012 / 0.55 M\$.
- Nadhour / 2011 / 1.3 M\$.
- Gafsa / 2011 / 0.15 M\$.
- Harboub / 2012 / 1.3 M\$.
- Siliana / 2011 / 0.6 M\$.
- Saouef / 2012 / 0.4 M\$.
- Sidi Bouzid / 2011 / 0.56 M\$.
- Sidi Elhéni / 2011 / 0.43 M\$.
- Kasserine / 2011 / 0.33 M\$.
- Sfax / 2011 / 0.45 M\$.

➤ **Head of Safety and Security Service - Ministry of Justice, Tunis (Full-Time) 2007 - 2011**

✓ **Project Main Features:**

- The idea was to build a centralized control room in Mornaguia, Borj El Amri, and Borj Erroumi prisons to implement a video surveillance system, an audio monitoring system, and a remote access control system with automatic doors:
 - Mornaguia / 2008 / 1 M\$.
 - Borj El Amri / 2009 / 0.9 M\$.
 - Nadhour / 2009 / 0.75 M\$.

✓ **Position Held:** Project Coordinator in charge of Security compliance.

✓ **Missions:**

- Development of the functional program for the centralized control room.
- Coordination with relevant authorities and stakeholders.
- Planning and implementation of the video surveillance system, audio monitoring system, and remote access control system with automatic doors.
- Collaboration with security experts and technology providers for system integration.
- Monitoring the construction process to ensure compliance with safety standards.
- Validation and testing of installed security systems.
- Coordination with local authorities for regulatory compliance.
- Training personnel on the use and maintenance of security equipment.
